## **In Altai Territory, pre-investigating check launched in media reports about gross violations in providing housing to girl released from orphanage**

One of the federal TV channels has broadcast a story about priding a girl who was released from an orphanage with a flat in the town of Barnaul worth 1.5 million rubles under the orphan rehousing program. However, the flat has some flaws made during the construction while the real market cost of the place is about 1 million rubles.

The investigators of the Altai Territory Directorate of the Investigative Committee are checking all the data on the situation and other details claimed in the story. During the check the investigators are going to evaluate the actions of the officials responsible for providing housing to orphans. A procedural decision will be made following the check.
