Germany under Hitler capitulated. Unfortunately many modern western politicians "forgot" what fascism had brought to the world – this is the death, a massacre, and sufferings of million of people, died on fronts of the Second World War and suffered in death camps. Today these western politicians prefer not to think about danger of destructive Nazi ideology. As a result we see that in situation of migration crisis, economic hardships, and impunity influence of the nationalist parties which are openly propagandizing racial enmity, extremism, and xenophobia strengthens, they destroy monuments for warriors emancipators". "On the Victory Day our country reminds such narrow-minded politicians of lessons of the most frightening war in the human history and warns about the possible political mistakes which can have the most serious consequences for all the mankind", – Alexander Bastrykin emphasized, having noted that "that is why we are trying to make war criminals committed crimes against peace and humanity in South Osetia, the South-East of Ukraine be punished in accordance with the norms of international and national law".
