
Chairman of the IC of Russia Instructs to Report on Information about Violation of Rights of Moscow District Residents

The media reported that residents of several detached houses in Molzhaninovsky District of the Northern Administrative Okrug of Moscow received bills for gasification of their houses that significantly violated their rights. It is noted that Muscovites were billed RUB 6 million 230 thousand for installation of a valve manifold box, while the gas pipe is located just 20 meters from their houses. The residents, including disabled and elderly people, still have to heat their houses on their own.

The Chairman of the Investigative Committee of the Russian Federation instructed Head of the Main Investigative Department of the IC of Russia for Moscow A. A. Strizhov to check the information reported by the media and to report on the results.
