
Chairman of the IC of Russia Instructs Officials to Investigate the Circumstances of the Shelling of a Coal Mine in the DPR

The Chairman of the IC of Russia has instructed officials to investigate the circumstances of the shelling of a coal mine in the Donetsk People's Republic by the Ukrainian armed groups.

According to reports, on March 14, Ukrainian nationalists shelled Kievsky Raion of the city of Donetsk. As a result, the ventilation shaft of the Zasyadko mine was cut out of power. More than 80 employees of the mine were underground at that time, the issue of their evacuation is being addressed.

Investigators of the IC of Russia will give a legal assessment of this fact. The circumstances of the incident are being established and the persons from among the Ukrainian nationalists involved in the shelling are being identified.
