
Chairman of the IC of Russia Instructs to Record and Investigate Instances of Armed Forces of Ukraine Shelling Russian Medical Aid Vehicles

The Chairman of the Investigative Committee of the Russian Federation instructed the Main Investigative Department of the IC of Russia to document and investigate the instances when Ukrainian artillery shelled Russian medical vehicles bearing a red cross in the special military operation zone.

According to the available information, servicemen of the Ukrainian armed formations carry out precision attacks against Russian medical aid vehicles bearing universally accepted identification marks of the established pattern in the form of a red cross.

A. I. Bastrykin instructed the MID of the IC of Russia to take measures to identify the persons involved in the incidents in order to subsequently bring them to justice.
