
Chairman of the IC of Russia Instructs Investigators to Initiate a Criminal Case Against Galina Hutsol

The Chairman of the IC of Russia has instructed investigators to initiate a criminal case against Galina Hutsol, the Scientific Deputy Director of Ukraine's Book Chamber.

Hutsol publicly called for maiming and causing serious harm to the health of captured Russian military personnel. This is not the first public person in Ukraine making such statements, which are also encouraged by the current government. By her actions, Hutsol once again confirms that the ideas of Nazism have deeply penetrated Ukraine's society and even engaged representatives of the education industry.

Following the instructions of the Chairman of the IC of Russia, investigators will give a criminal and legal assessment of Hutsol's statements as part of the investigation.
