
Investigating Officers made the inspection of the two military bases of the «Azov» battalion

During the investigation of the crime, launched in accordance with Part. 1 Art. 356 of the Criminal Code of the RF (use of banned means and methods in warfare) the investigation Officers of the Investigative Committee of Russian Federation made the inspection of two habitual bases of the “Azov” battalion military servicemen. They are located on the coast of the Azov Sea in the Urzuf and Yuryevka villages in Donetsk People's Republic.

Thus, the accommodation places, the places for training of battalion militants were inspected, as well as warehouses for the weapons and ammunition storage, equipment, fuel and lubricants storage places were inspected too. As a result of this work, the official documentation was discovered. It contains the information on the personnel of the battalion "Azov", reflects the personal data of its participants. More than 10 thousand cartridges were also discovered, including the production of the United States and Lithuania (GGG 308 WIN», «Siera 308 DIA», «Large Magnum Rifle», «Lapuna»,

«S&M8mm», «Horndey»), 212 grenades Various modifications, 130 mortar mines, 48 anti-tank and anti-personnel mines, 12 manual anti-tank grenade launchers and 224 shots to them, as well as 2 cannons D-20. After the proper photo and video documentation, weapons and ammunition were transferred to the People's Militia of the People's Republic.

In addition, the literature of a nationalist content was discovered, as well as the objects with the fascist symbolism. After the criminal case will be finalized, all of these things will be eliminated.
