
Investigators of the IC of Russia to Check Reports on Missile Strikes Launched by the Armed Forces of Ukraine Against the Center of Kherson

The Investigative Committee will request documents from the Ministry of Defense of the Russian Federation containing information about the shelling of the city center of Kherson by the Armed Forces of Ukraine.

A series of powerful explosions near the television center in Kherson was reported as a result of shelling by the Ukrainian side. The Tochka-U missile systems and the Uragan multiple launch rocket systems were used to shell the city center. A missile fired by the Armed Forces of Ukraine was shot down by the Russian military. The Ukrainian military targeted at the administration building, which was under the control of the Armed Forces of the Russian Federation. The details of the casualties are currently being clarified.

Investigators of the IC of Russia will attach the respective documents to the materials of criminal cases on the crimes of the Ukrainian military, analyze the information received and identify the persons acting as the initiators and executors of the shelling.
