
The Chairman of the Investigative Committee of Russia instructs to validate the information about the Russian ship and its sailors under a prolonged detainment in the Ukrainian port

Russian sailors, held as hostages in a Ukrainian port, recorded a video message asking to return them home. They reported that they are being guarded by armed people who do not allow them to go ashore. In early February the vessel "Volgo-Balt 225" has arrived for repairs at the shipyard of the Izmail city located in Odesskaya oblast. Since the start of the special operation, the crew has been detained on board.

Mr. Alexander Ivanovich Bastrykin instructed the Main Investigation Directorate of the Investigative Committee of the Russian Federation to request from the Russian Foreign Ministry available information and carry out a procedural inspection, present a detailed report about the results.
