
The Chairman of the Investigative Committee of Russia instructs to conduct an inspection on information about a possible violation of the rights of Samara citizens

Residents of apartment buildings in the Samara city expressed their concerns in the media about the violation of their rights in terms of assessing the cost of housing, the resettlement is taking place in connection with the construction of station in the city center. Citizens believe that their rights have already been violated and disagree with the amounts of compensation, which, in their opinion, do not correspond to the actual cost of housing, and therefore they will not be able to purchase equivalent apartments.

The Chairman of the Investigative Committee of Russia instructed Mr. M. F. Galikhanov, the Head of the Investigative Directorate for Samara oblast, to organize an inspection on this information and submit a report. The inspection is a subject to control in the Main Investigative Directorate of the Investigative Committee.
