
The Investigative Committee of Russia launches a criminal investigation on the shelling of civilians by the Armed Forces of Ukraine at a ferry in Kherson Oblast

Investigators of the Investigative Committee of Russia launched a criminal investigation on the attack committed by the Armed Forces of Ukraine on the ferry in Kherson, through which civilians passed.

It was detected that the civilian column followed through the ferry from Kherson to the other side of the river. At that moment, Ukrainian nationalists deliberately attacked the ferry using the American HIMARS MLRS with cluster munitions for a greater damaging effect. According to preliminary data, four people died and 13 were injured. Among the dead and injured are children and representatives of local media. At the moment, information has been received about two killed journalists who were among the residents at the ferry. These facts once again prove the outright cynicism of the Kiev regime, which purposefully exposes the civilian population to shelling.
