
Congratulations of the Chairman of the Investigative Committee of Russia on Mother's Day

Dear Women, dear Mothers!

Please accept my warmest congratulations on Mother's Day!

On this day, we express our gratitude, boundless love and appreciation to our Mothers. You are the embodiment of kindness and tenderness, the best people in the world who gave us life! Being a mother is a huge responsibility and tireless work, an important mission that requires high dedication, self-organization, mental strength and emotions from women. The responsibility for the successful development of the individual falls on their shoulders.

Maternal love makes us stronger, helps us overcome adversity and believe in ourselves. Mom is the support of the family, support in difficult times, and it is an inexhaustible source of kindness and

understanding.

Today, many women work equally with men. Officers of the Investigative Committee perform difficult official tasks, while remaining attractive and charming, loving and caring mothers, keepers of the hearth and family values.

On this special day, special words of gratitude are given to mothers whose sons, the Officers of the Investigative Committee of Russia, perform special tasks in criminal investigations of crimes committed by Ukrainian Nazis and international terrorists in the special military operation zone. I wish you fortitude and courage, calmness and confidence.

I express special gratitude and words of admiration to our mothers of many children and those who adopted an orphan child into the family.

With all my heart I wish all mothers good health, great maternal happiness.

May your hearts be warmed by the love and care of people close to you, and let the warm, comfort and joy, love and harmony always reign in families!

Happy holiday!

Chairman of the Investigative Committee
Russian Federation

General of Justice of the Russian Federation A.I. Bastrykin
