

Demonstration of new documentaries called “Without A Statute Of Limitations. From The Arms Of Death” and "Unworthy Heirs" will be presented on the TV channel "Russia 24"

This weekend there will be premiere show of the documentaries titled "Without a statute of limitations. From the arms of death" and "Unworthy heirs", produced by the National Film Fund "Patriot" LLC with the assistance of the Russian Investigative Committee.

The first film is devoted to the investigation of the crimes on the genocide of the Soviet people by the Nazis and their collaborators during the Great Patriotic War.

The victory of the USSR over the Nazi invaders came at a high price. Not only soldiers of the Red Army gave their lives for peace of future generations, but also civilians, including women and children, who were subjected to genocide by the invaders. 80 years ago, the Extraordinary State Commission was established in the USSR to detect and investigate the atrocities of the Nazi invaders. The results of its work were used during open trials of the Nazis and their collaborators, as well as during the Nuremberg Tribunal. However, not all criminals were convicted then. Therefore, the work of the predecessors today is continued by the Investigators of the Investigative Committee

of Russia. A Directorate for the investigation of war crimes, genocide and the rehabilitation of Nazism has been established in the Main Investigative Directorate of the Department.

What is stored in the archives, and what eyewitnesses of those terrible days told us, as well as how the principle of the inevitability of punishment for genocide and the rehabilitation of Nazism is being implemented - watch all this on December 3 on the Russia 24 TV Channel at 17.00 (Moscow time) .

Another film is dedicated to the work of Investigators in solving crimes committed due to inheritance.

Luxury real estate, expensive cars, jewelry, bank accounts - in movies, such luxury often becomes an object of desire for selfish relatives who are ready to even kill a loved one for personal gain. In life, such cases also not so much uncommon, and sometimes the price of life is an ordinary small apartment, an old car or a small wooden house located far outside the city. In pursuit of profit, the heirs resort to a variety of tricks and go to the most desperate and cruel deeds. Investigators of the Investigative Committee of Russia have seen in practice that the closest person can become a dangerous enemy.

Who are the "unworthy heirs", why the competition for inheritance leads to a blood-drenched drama and how investigators understand the ups and downs of family relations - watch all this on December 4 on the Russia 24 TV Channel at 17.00 (Moscow time).
