

The TV channel "Russia 24" will show a new documentary called "A very terrible power"

The Russia 24 TV channel will air the documentary called "A Very Terrible Power", produced by the "Patriot" National Film Fund LLC with the assistance of the Russian Investigative Committee. The movie is dedicated to the work of investigators in resolving crimes against plastic surgery and cosmetology.

Advertisements are full of suggestions on how to prolong youth, change the shape of the nose, lose weight quickly. People become literally slaves of plastic surgeons for the sake of eternal youth and compliance with mythical standards of beauty. But very often such institutions have fake certificates, or clients go to self-taught charlatans who perform surgeries ... at home. As a result, patients get a lot of problems and complications instead of fulfilling their dreams. There are also deaths. Investigators of the Investigative Committee of Russia have to understand the nuances of unsuccessful plastic surgeries.

How unscrupulous cosmetologists and plastic surgeons lure those who are dissatisfied with their appearance, why people are ready to take any risks in pursuit of the ideal, and how beauty requires sacrifice in the literal sense - watch all this on December 11 on the Russia 24 TV channel at 17.05 (

time Moscow time).
