
The results of the vessel Arctic Sea examination

Today a group of Russian investigators has left the ship Arctic Sea and will be delivered to Russia by air.

During the investigation the things of the accused of piracy and kidnapping were taken from the vessel, as well as the boat, on which pirates approached the Arctic Sea. Modern equipment was used to study the ship. The experts examined the vessel thoroughly both inside and outside. It was established that the ship carried only timber and saw timber. No other cargo that might compromise the Russian Federation has been found on the vessel.

Criminal investigation continues.
