
Check into destruction of highway section built for APEC summit

Primorye investigating bodies of the Russia's Investigative Committee have started check into the fact of destruction of the part of highway which was being built for APEC summit in Vladivostok.

During the check investigators are going to find out the causes of destruction, including the role of leaders of organizations and enterprises, which projected and built the highway and officials accepting it in operation. Specialists of relevant control bodies are also employed in the check.

A procedural decision will be made following the pre-investigative check.
