
Check launched in Volgograd Region in hospitalization of residents of children's home

Today about 9 AM the investigating bodies of the Russia's Investigative Committee in Volgograd Region received a report that 8 residents of children's home had been taken to a hospital in Rudnyansky district. A pre-investigating check in the incident is underway.

According to preliminary information, doctors diagnosed the children with an unidentified enteric infection. The youngest of the patients is 4, the oldest – 10. At present their condition is satisfying, there is no danger for the children's lives.

At present measures are being taken to find all the circumstances of the incident. A procedural decision will be made following the check.
