
Investigators request arrest of drug counterfeiters

Today investigators have filed a request to arrest 4 suspects of dealing in counterfeit medicines. The case was opened in a crime under paragraph “a” of part 2 of article 238.1 of the RF Penal Code.

The investigators believe that there are enough reasons to arrest Igor Zhukovsky, Anzhelika Yeroshina, Vladimir Sergeyev and Svetlana Fedotova. The evidence against them was got during the searches and other investigative operations. Having seen the said evidence some of the suspects have already confessed to the crime and told about the scheme and people involved in it.

The investigators think that staying at large the suspects may continue their criminal activity or affect the progress of the investigation. However Lyubertsy Town Court considered the evidence insufficient and postponed the review of the request for 72 hours.

If such people stay at large, then they and suchlike will continue poison people and stuff their pockets with ill-gotten money. And then they will pay this money to their lawyers who will convince

everybody that honest businessmen are being harassed.
